PROJECTS

FrameRate: Movie Tracking Web Application

[Live Demo](#)

React.js, Node.js, PostgreSQL

- Built a full-stack movie tracking app with a React.js frontend, a Node.js/Express.js backend, and a PostgreSQL (Neon) database.
- Implemented JWT-based authentication with bcrypt password hashing to keep user accounts and viewing history secure.
- Integrated the TMDb API for movie data, enabling users to search, browse, and track detailed movie information.
- Deployed the frontend on Vercel and the backend on Render.

Personal Portfolio Website

[Live Demo](#)

HTML5, CSS3

- Built a responsive personal portfolio website using HTML5 and CSS3, ensuring consistent layout and functionality across desktop and mobile devices.
- Followed clean, maintainable coding practices to structure content and styling for easy future updates.
- Used Git for version control throughout development and deployed the final build on Vercel.
